Smart electric tugs for effortless transport around the clock

Movexx smart electric tugs for airports are engineered for safe, efficient, and silent operation across terminals, baggage areas, and airside environments. Perfect for moving carts, containers, and equipment, Movexx tugs help reduce manual handling, prevent injuries, and keep airport operations running smoothly.

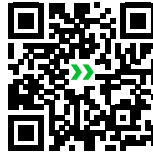

Powered by robust LiFePO₄ batteries with a swappable system, they deliver continuous uptime: ideal for 24/7 airport operations.

Discover how Movexx can improve your airport logistics and ground handling. Contact us for a free on-site demonstration.

Smart electric tugs are:

- » Ready for 24/7 use with quick-swap batteries
- » Compact, quiet, and easy to maneuver, even in crowded areas
- » Customizable for your specific ground-handling requirements
- » Built to move loads up to 6,000 kg or 13,200 lbs
- » Ideal for terminals, baggage handling, catering, and maintenance logistics
- » Backed by a global service and support network
