

### Glass Reinforced Plastic Grit Bin

Our Glass Reinforced Plastic Grit Bin is a single skin, durable grit bin with a smooth easy clean finish, suitable for sand, grit or salt.

This grit bin is UV stabilised to ensure there is no discolouration or deterioration through long term exposure to the elements, which means that they can remain in-situ all year round.

The smooth, sloped lid prevents heavy snow and ice from building up on top of the bin, with a lift up hinged lid for convenient access.

### ASB/50 Post Mountable Litter Bin

The ASB/50 Post Mountable Litter Bin has a 50 litre capacity and is perfect for mounting on posts or walls.

This litter bin comes in black, green or orange and features a hinged self locking top which fixes to a post or wall, and the bottom section of the bin lifts off allowing it to be emptied. Complete with a Tidyman logo as standard - other vinyl waste stickers are available on request.

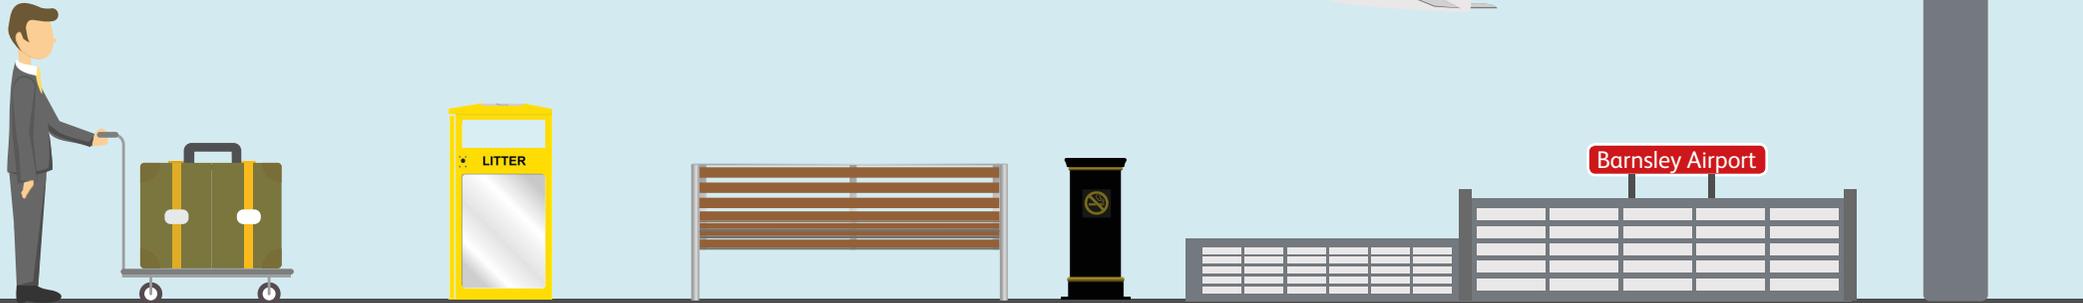

The MLB/112 is designed to offer a premium metallic option with a bulkier feel for modern litter solutions.

This litter bin is manufactured from 2mm hot dipped galvanised steel, primed and powder coated in your choice of RAL colour. A large aperture to each side maximises the 112 litre capacity, with internal litter deflectors to ensure waste goes inside the liner.

As with all Wybone galvanised steel litter bins, the MLB/112 comes with a standard 1 year parts and labour guarantee and a 10 year anti-perforation warranty.

### MLB/112 Litter Bin

### BMB2/40T Transparent Security Litter Bin

The BMB2/40T Transparent Security Litter Bin is designed to offer a secure litter bin to prevent suspect items from being deposited.

This security litter bin is manufactured from durable, British bought galvanised steel with transparent polycarbonate panels to all sides and four large apertures to maximise litter collection.

The 2mm hot dipped galvanised steel ensures a robust manufacture and makes the bin difficult to damage.

The transparent polycarbonate panels make the contents of the bin visible, allowing any suspect packages to be easily identified and immediately removed.

These yellow litter bins were manufactured for Manchester Airport but can be powder coated in any of our standard colours.

The LBV/FCB Cigarette End Pedestal Bin is a large capacity, heavy duty bin to collect cigarette ends.

Manufactured from glass fibre composite, this ashtray is protected from the elements and will remain intact for years to come.

This unit features a lockable powder coated, galvanised steel ashtray and liner module, with 'No Smoking' perspex plates fitted to the front & back.

### LBV/FCB Cigarette End Pedestal Bin

### Omega Seat

Part of our Omega range, the Omega Seat utilises the characteristic tubular frame in an elegant 'S' style design, that has a weightless quality achieved by extended legs that can be ground fixed for extra stability.

Available as a single unit or double width unit, with Iroko hardwood slats in dark, light and natural oak finishes. The frame can be powder coated in any of our standard colours.

### Security Check

Lute Stream  
Liquid  
Preparation  
Unit

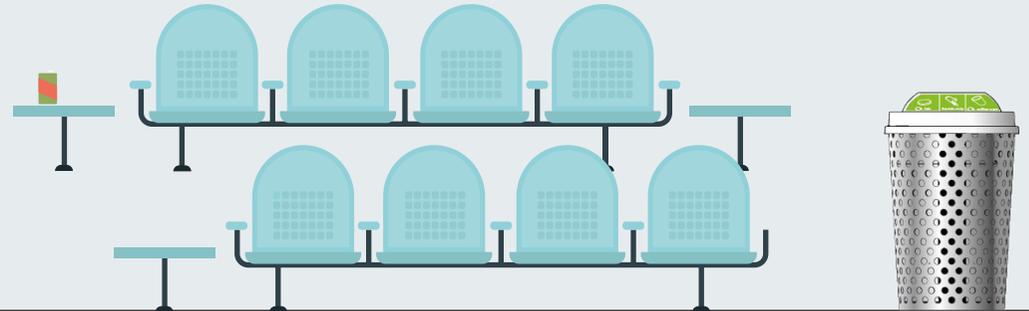

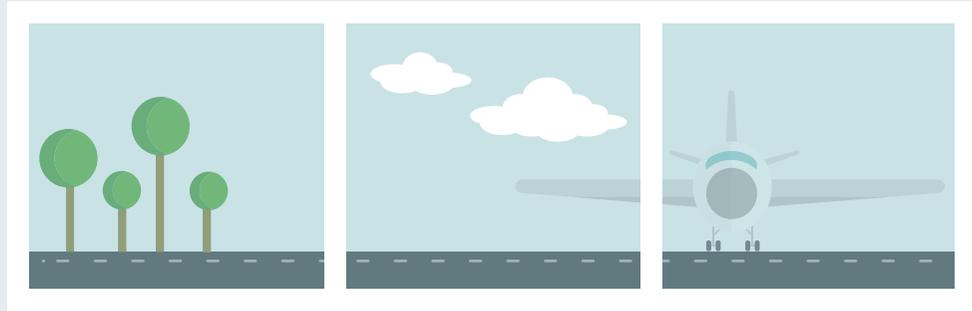

The newest addition to our Lute Recycling Range, helping to significantly improve the passenger divestment experience.

Designed for Birmingham Airport, this three-bin modular unit incorporates two sets of racks for cases and bags to be placed whilst passengers remove restricted items, with a transparent cabinet to display examples of accepted and restricted items.

This unit has been designed with a clear plastic bag dispenser fitted to the backboard, which opens from the top for convenient refilling.

The curved design allows waste streams to be easily identified - choose from any of our standard waste or recycling apertures to suit your requirements.

The Torpedo Triple Transparent Recycling Bin is manufactured from 2mm durable galvanised steel, primed and powder coated in your choice of RAL colour with transparent polycarbonate panels on the front opening doors.

The transparent panels make the contents of the bin visible, allowing any suspect packages to be easily identified and immediately removed.

The magnetic catch double doors make this bin easy to open and quick to empty with a sloped lid that prevents litter being left on top of the unit.

Transparent units also help to prevent cross contamination, as people using the bin can immediately see what waste is being collected.

Recycling Bin**

The new Security Eco Cup Bin features a rolled galvanised steel body with perforations to make the contents visible.

The perforations allow suspect items to be seen and removed, but remain small enough to prevent any access by hand.

The vacuum formed durable plastic lid features two circular apertures for the collection of paper cups and lids with a smaller circular aperture for collecting waste liquids.

The front facing sloped display board comes as standard, and features recycling artwork above each aperture.

Cup Bin**

### Torpedo Triple with Tray Unit

This stylish recycling bin is our standard Torpedo Triple Recycling Bin design, featuring a flat hooded top with a rubberised grip mat for the collection and storage of food trays.

Manufactured from premium quality galvanised steel, this bin can be powder coated in any of our standard colours to suit your requirements, with a choice of artwork to collect your chosen waste stream.

Magnetic catch double doors make this bin easy to open and quick to empty, with nylon glides fitted to the base of the bin to stop any floor marking.

The Torpedo Triple has a 162 litre capacity with three separate compartments, keeping it segregated to avoid cross contamination.

### Box Cycle Triple

The Box Cycle Triple Recycling Bin is an interchangeable recycling bin with lift off lids, available in plastic or galvanised steel, with a transparent body as standard.

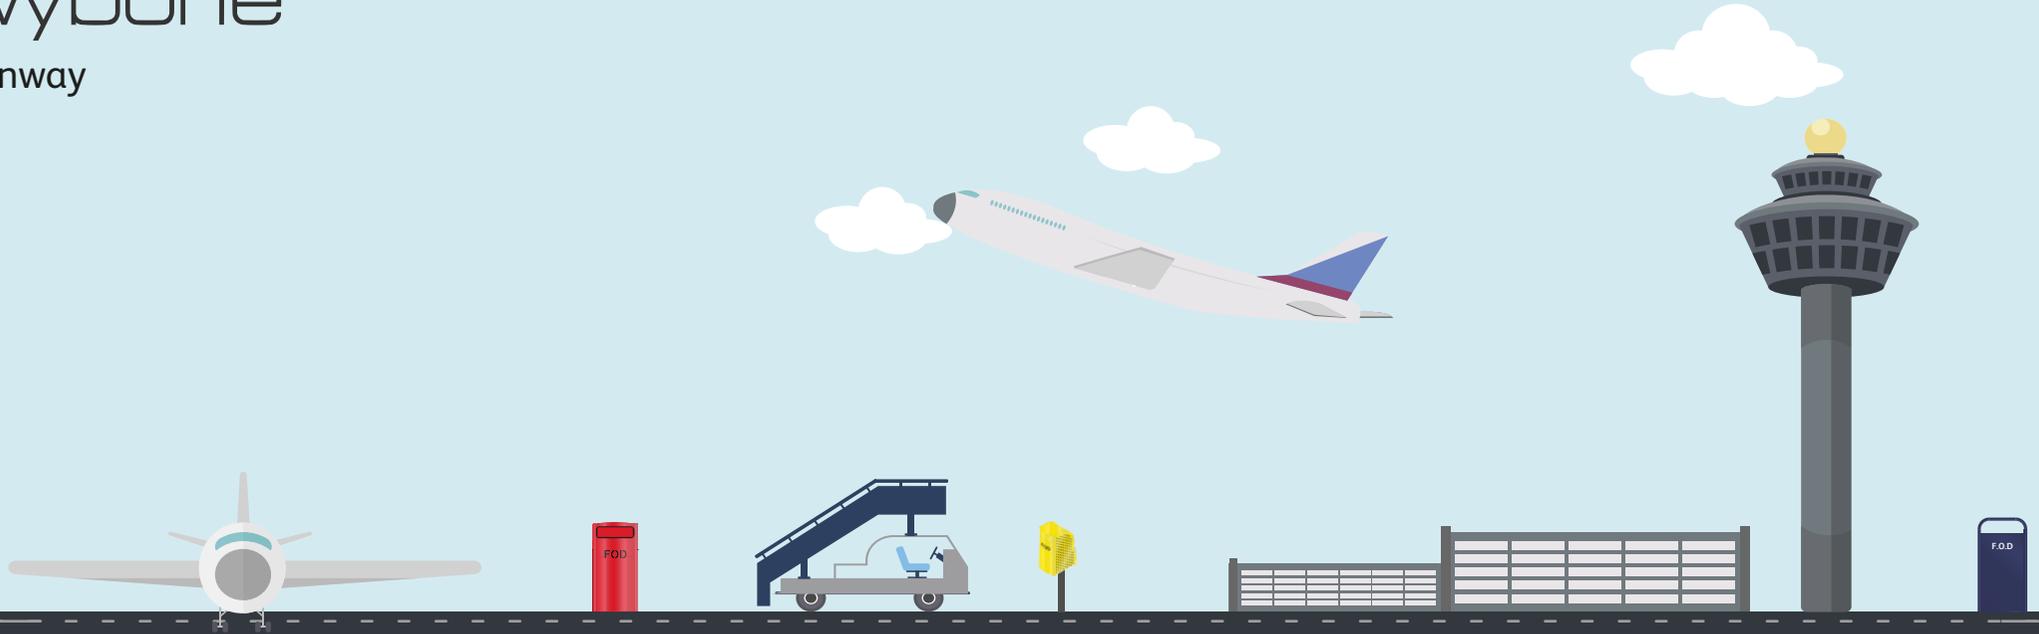

The transparent body offers a number of benefits, including making the waste streams visible therefore encouraging the correct use, highlighting any miscellaneous objects that could pose a security risk and giving a visual cue as to when the bin needs to be emptied.

We recommend selecting a silver body for the collection of general waste or food waste, this prevents the contents from being seen by users.

The Box Cycle Triple offers a 180 or 240 litre capacity in three separate compartments, allowing you to choose the correct size based on the volume of waste you expect to collect.

This recycling bin comes with a range of optional extras, including a backboard which can be used to display artwork of your chosen waste stream.

### Sail 240

'F.O.D' stands for **Foreign Object Debris** - these bins are ideal for airport runways and can quickly and efficiently dispose of any debris that may pose a risk.

The Sail/240 has been designed specifically for airports, housing a 240 litre wheelie bin.

Manufactured from robust galvanised steel, with high visibility reflective stripes that allow the bin to be seen on the runway.

A bird-flap stops access to the bin, with laser cut 'F.O.D' at the front of the unit, with a black backing plate to emphasise the waste stream.

### Mega Cycle Wheelie Bin Cover

The Mega Cycle Wheelie Bin Cover is ideal for collecting large amounts of waste, manufactured with a wider aperture specifically for airports.

This large unit is capable of housing a 120, 140 or 240 litre wheelie bin.

Shown with 'F.O.D' vinyl artwork to the front of the unit to collect waste on the runway.

Manufactured from galvanised steel, this is a tough, durable unit featuring a reinforced front opening steel door, with a self locking mechanism and a stainless steel rod hinge.

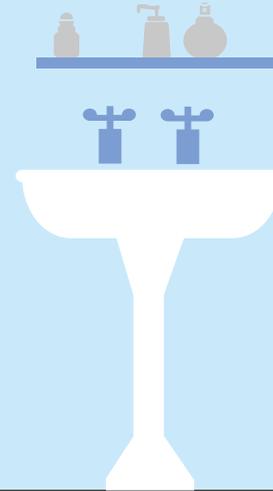

### Post Mountable F.O.D

The Post Mountable F.O.D Litter Bin has been designed to be placed on walls or posts to collect smaller unwanted items on the runway.

This bin is powder coated in vibrant yellow to make the unit stand out, with laser cut 'F.O.D' at the front as standard. The bird flap on the aperture prevents any access to the bin and its contents.

The Torpedo Single Recycling Bin is a circular recycling bin with a chrome swing top lid to collect your chosen waste stream.

The Capsule II All Plastic Sackholder is the latest edition to our Sackholder family, specifically designed and manufactured to meet the demand for a plastic sackholder to be supplied to the NHS.

This Wybone Slimline Sanitary Bin with 28 litre capacity has been designed specifically for the collection of feminine waste and sanitary products.

### Torpedo Single

This recycling bin is manufactured from durable galvanised steel, expertly primed and powder coated in your choice of RAL colour, with a sack retaining lift-off chrome swing lid featuring WRAP iconography as standard to emphasise your chosen waste stream.

### Capsule II All Plastic Sackholder

This new sackholder is manufactured completely from durable ABS grade plastic. All fixtures and fittings have been manufactured from plastic, including small nuts, bolts and plastic uprights to the back of the bin.

Manufactured from robust galvanised steel to ensure durability and strength over time. The unit is powder coated using silver ion technology and anti-microbial coating to ensure cleanliness and hygiene.

### Sanitary Bin

This special paint reduces the chances of bacteria being spread on the surface of the bin and gives the user peace of mind when operating the unit by hand.

The Torpedo Single is available in three sizes; 60, 70 and 80 litres. The weighted swing lid provides better fire protection and helps to contain unwanted odours.

The multi-point pedal access makes operating the unit easy, no matter which angle it is pressed.

The integrated plastic damper allows the lid to close slowly in a controlled and quiet manner.
