Warsaw, dated 10th July 2015

Mr Dmytro Kuczeruk
Sales Director
Solutions4GA Sp. z o.o.
ul. Sylwestra Kaliskiego 57
01-476 Warsaw

Dear Mr Director,

We have the pleasure to confirm the high quality of the tested runway lighting systems produced by Solutons4GA.

During the conducted night-time tests of the autonomous, remotely controlled LIGHTBOX lighting system the parameters presented in the promotional material were confirmed.

The system may be easily and quickly controlled from a helicopter.

The lighting is visible from the distance of 4 miles (in good weather conditions). Both, the LIGHTBOX and LIGHTBOXmini system may be easily operated and mounted. An additional value is their mobility and possibility of being installed in any location.
