

Dear Sir or Madam,

On behalf of Versatile Air Services I would like to confirm that Solutions4GA LLC ("S4GA") has successfully delivered portable runway lighting to support continuity of air taxi and air cargo operations performed by Versatile Air Services. Our portable runway lighting includes edge (omni-directional), threshold (bi-directional) lighting units and chargers. The system has been in use for almost a year now and we are very satisfied with its performance, reliability and the visibility range it is providing to our pilots.

We would highly recommend this product to other S4GA custom

Sincerely
Dominik Danilovic
General Manager
