# DOUBLE WALL TANKS UP TO 100m<sup>3</sup> FOR PRIVATE USER

- Double wall construction in comply with latest international standards and regulation
- Inspection hole DN 600 (stainless steel INOX) with gasket
- Piping and nozzles in the tank are made of stainless steel INOX
- Internal tank – carbon steel S235JRG2 acc. to PN-EN 10025-2
- External tank - carbon steel S235JRG2 acc. to PN-EN 10025-2
- Suction pipe equipped with a check valve with strainer
- Suction pipe for residual fuel, water and impurities in the clarifier
- VRS tip of flame arrester and check valve to the vapor
- Leak monitoring system
- Overfill prevention system
- Full support of the tank
- Side ladder
- Suction outlet from the tank to the distributor
- Lifting and earthing handles
- Warranty for the tank surface – 60 months
- Interior of the tank secured by a special multi-layer polymer-epoxy paint, approved for aviation fuels
- Exterior tank painted by a special paint resistant to aviation fuel

## AVIATION FUEL DISPENSER FOR INTERNAL USE WITH THE EQUIPMENT:

- Distribution set AV-ASG80/230V, pump the EX-performance, flow-rate 80 l / min, gas-tight mechanical meter, automatic nozzle
- Technological pipeline from tank to distributor with stainless INOX valves
- Locked distribution box
- Automatic grounding reel, 16m copper cable with clamp
- Fuel hose certified for aviation fuel 15 m, both sides provided with a tip
- Automatic hose reel for 15 m hose (with spring)
- Two-stage aviation fuel filter type EN-VF-250
