

Eco-Friendly Products for a Sustainable World

The Bamboovement

The Bamboovement

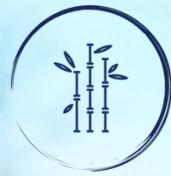

Movement

Reports show that by 2050 there will be more plastic in the oceans than there are fish. Beaches, oceans and waterways are clogging up with plastic. And as little as 8% of all plastic is currently being recycled.

From busy tourist beaches to uninhabited tropical islands. Plastic is currently inescapable however not inevitable.

This principle has been the groundwork for our movement.

The Bamboovement

Based in Amsterdam, The Bamboovement was founded to raise consciousness on the rapid increase of global plastic consumption.

Dozens of single-use plastic items can't be recycled, including: cotton buds, toothbrushes, straws, disposable cups, not-rinsed shampoo bottles, cutlery.

More legislation has been set in place by local governments as well as national and supranational institutions. An example is the ban on a dozen plastic items set by the EU in 2021.

A hand holding a coconut with a bamboo straw on a beach. The background shows a sandy beach, turquoise water, and a blue sky with light clouds. The hand is wearing a simple, light-colored wristband.

Mission

By providing high-end sustainable alternatives for plastic products to the hospitality, travel and food industry we aim to cut out single-use plastic products.

The Bamboovement embraces the idea that simple sustainable actions put together make a positive change.

This starts with the evolution of a sustainable material that inspires eco-lifestyles that are beneficial to our planet's well-being. Leading us towards a cleaner world for all living beings.

Carbon Sinks of the Planet

Research demonstrated that bamboo can absorb as much as 12 tonnes of carbon dioxide per hectare per year, giving the plant a potentially crucial role in stabilizing our planet's atmosphere.

Fast Grower

Our products are made of MOSO bamboo, this is one of the fastest growing types of bamboo. It can reach a height of 3 meters in just three weeks.

B A M B O O

There are few other natural resources as versatile as bamboo. In ancient China bamboo was already widely used for tools, paper, food and building materials. Nowadays the possibilities have only increased with bamboo being found in landscaping, fabrics and a boundless variety of products.

Absorbs Greenhouse Gases

Bamboo produces 35% more oxygen than any kind of hardwood. And thus can be used to make the air more livable in polluted areas.

Prevents Erosion

It can also be used to "repair" soil damaged by overgrazing and poor agricultural techniques, while its complex network of roots is ideal for preventing soil erosion and flooding.

No chemicals

Bamboo has unique anti-bacterial bio-agents and thus doesn't need chemical pesticides and fertilizers.

OUR BAMBOO

The bamboo that is used for our products either come from Indonesia or from Fujian, China. With its abundant rainfall and hilly topography, Fujian has more than one million hectare of bamboo forest.

All the bamboo we use has the FSC label to guarantee sustainable forestry. 

PRODUCTS

We have created a wide collection of bamboo products to replace plastic items. Ranging from cutlery, toothbrushes, straws, combs, cotton buds to watches and sunglasses.

AMENITY KIT

Create your very own personalized sustainable amenity set from our product range. Find all products in the catalog.

Innovative products

By working with a handful of partners and pioneers within the organic cosmetic industry we can continue to deliver renewing products that match the highest standards.

C O S M E T I C S

An amenity kit isn't complete without cosmetic products. We are committed to use organic products as much as possible. Ingredients are labeled by COSMOS standards to ensure its sustainability. By using pure and natural ingredients we are able to offer an exclusive set of cosmetic items that surpass customer's expectations and are beneficial to the well-being our planet.

Toothpaste Tablets

Unlike your typical toothpastes our tabs don't contain micro-plastic or other preservatives. They come in sets of four in a small recycled bag. They are made of natural cellulose, leaving your teeth more polished than with regular toothpaste.

Shampoo & Conditioner

Switching parabens, sulfates and other chemicals by organic ingredients result in impeccable natural products. Our shampoo-, shaving- and soap bars are produced in Finland from local ingredients.

Travel The World Sustainable

PLASTIC ON THE ROAD

Traveling can significantly increase someone's plastic consumption. It can be hard to find sustainable items when you're away from home, countries might not recycle the same way as one is used to and local restaurants/shops might use a lot of plastic.

TRAVELING PLASTIC-FREE

Together with travel agencies The Bamboovement creates travel sets for the eco-friendly traveler to start his or her journey sustainable. Provide your guests with a bamboo toothbrush, cork toiletry bag, reusable water bottle, bamboo straws and other eco-friendly products.

GIFT PRODUCTS

We have a wide product range of sustainable promotional gifts. From bamboo watches and sunglasses to Christmas boxes, eco-friendly toiletry bags and many other products.

Take a look at our catalog to find an overview of all our items and contact us for the possibilities regarding customization.

A sea turtle is shown swimming underwater, holding a piece of clear plastic in its mouth. The water is blue and sunlit, with bubbles visible. The turtle's head and front flippers are prominent.

TIME TO ACT

Simple steps do make a big difference if we take them together. Swapping to a bamboo toothbrush is one of the many options we can take to reduce our plastic footprint.

Our planet is suffocating in plastic all over world for unnecessary reasons. The time to act is right now.
