

1 FLYKEEPER®

# Total Fleet Management

**Deliver quality passenger experience and manage daily operations seamlessly with the right planning and forecasting tools.**

## Benefits of FlyKeeper® Total Fleet Management

- Supervise operations on all operated airports
- Mobility
- Real-time monitoring
- Post-ops analysis
- Instant messaging
- Manage adverse conditions
- Optimize fleet allocation

The air travel industry is growing rapidly with an increasing number of passengers and competitors, it is key for Airlines to focus on ensuring the best possible passenger experience. In order to do this efficiently and in a cost effective manner, it is crucial to have all the necessary up-to-date information on your fleet, the situation at different airports and en route to anticipate different events and prevent the escalation of disruptions.

Total Fleet Management is a holistic tool that enables Airlines to have an accurate view of flight schedules and more importantly, it is a decision making tool that enables Airlines to plan ahead by providing solutions to avoid disruptions as early as possible.

It is a single tool that incorporates information from as many different sources as necessary in order to paint the most accurate picture in one place, providing consolidated data and solutions to optimize fleet management.

### SAVE TIME

Respond to NM feedback on flight plans instantly via direct connection to the Flight Plan Optimization Tool. Use the Resolution Centre to analyze, compare and choose modifications suggested by FlyKeeper® TFM in order to optimize the flight plan and ensure Network Manager (NM) validation.

### PREDICT UPCOMING EVENTS

Use the Fleet Alerting Rule Engine to define your rules and receive alerts in order to manage constraints, such as weather and capacity, in advance and limit the impact on flights and schedules. Manage resources efficiently with alerts on passenger numbers, aircraft and airport changes in order to allocate the right resources such as aircraft capacity and crew members.

### RESOLVE EFFICIENTLY

The Resolution Center provides suggestions, solutions and alternatives to all identified issues and alerts in order to optimize planning in a cost efficient manner and improve day operations continuously.

### USE ACCURATE DATA

Provide passengers the best experience with our PAX Tracking function connected to your passenger data system to enable better communication and better situational awareness. Make informed decisions with information on passenger whereabouts, status and scheduled connections.

### REAL TIME VISUALIZATION

Use the Flight Tracking and Map View to visualize and track your fleet in real-time and anticipate changes. Use the Movement Control View to visualize and resolve passenger connection failure alerts swiftly.

Designed to go beyond information sharing and visualization, FlyKeeper® TFM is a planning tool that finds the best solutions to problems.

## ABOUT INNOV'ATM

Innov'ATM is an innovative technology company based in Toulouse, founded in 2014 and a subsidiary of Groupe ADP since 2018.

Counting on 30 highly skilled engineers and our ATI expertise we help Air Transport Operators with the most effective, efficient, sustainable, shared and agreed decision making technology solutions, through artificial intelligence and machine learning.
