

Keep Up the Good Work

Introducing Rapid Infection Detection

Protect them *and* productivity with a simple fingerstick test. FebriDx® is the first and only rapid point-of-care test which can effectively rule out an infection.

Workplace survey data (2020):

- More than half of employees want to return to the workplace if it is safe^{1,2}
- Over 45% of essential employees have not been coming to work for fear of getting sick³
- Transparency about how employers are ensuring a safe workplace is key to gaining employee confidence¹

- All-in-one test device using fingerstick blood
- Accurate results in **10 minutes**
- Instrument-free means no expensive equipment and a fully portable solution
