

Ink Health Platform

Reactivating Travel

Seamlessly verify Covid-19 test and vaccination status of crew and passengers before departure

Validate multiple Digital Health Wallets

Support any types of Digital Health Wallets and future standards

Get results directly from laboratories

Creates a trust chain across laboratories, airlines and government agencies

Seamless integration with aviation systems

Works with any airline, airport or immigration system

Quickly establish testing capacity

Let Ink manage the relationship with labs across your entire network

Coordinate and automate crew testing

Reduce manual errors and ensure crew testing compliance

Validate Covid-19 paper test certificates

Process 100% of paper test certificates from day 1 and migrate to QR codes

Reduce fraud

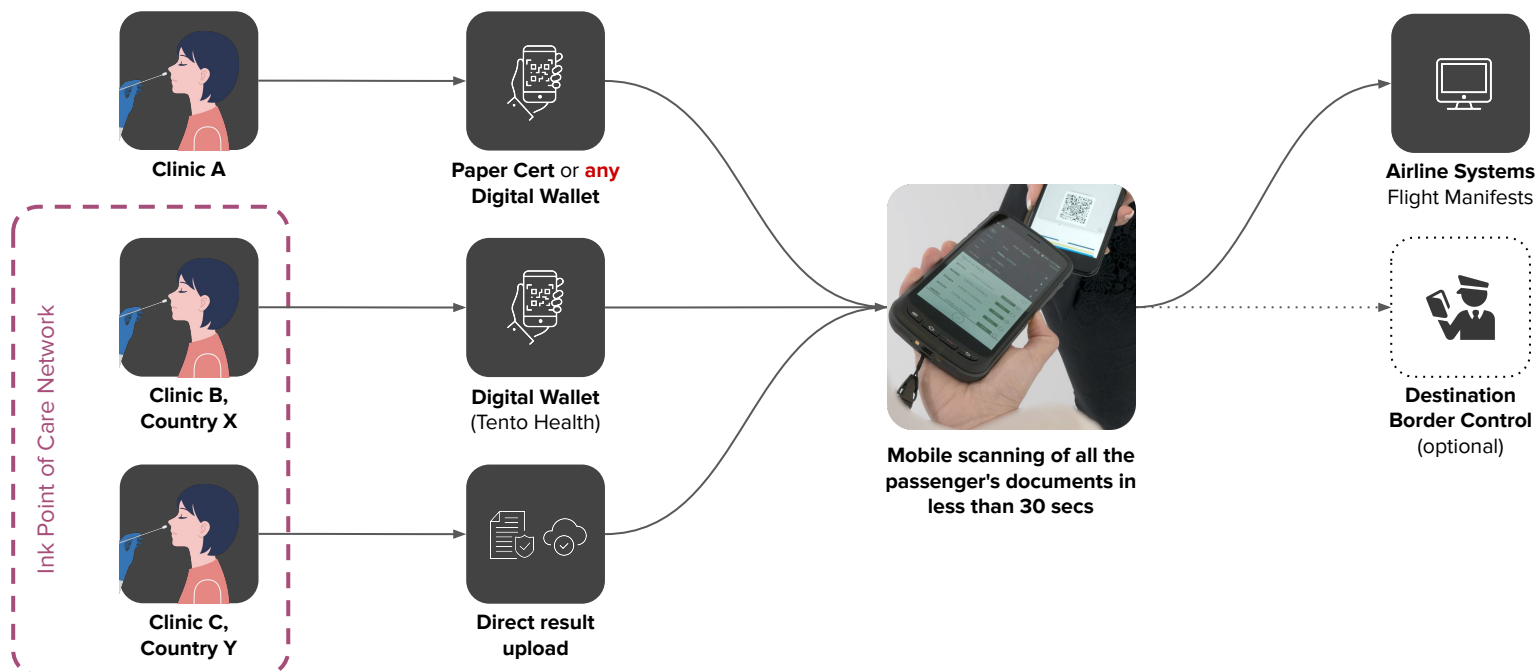

Protect your airline from the rising trend of fraudulent Covid-19 test result certificates, which will inevitably extend to fake vaccination certificates. Avoid transporting people who will later be rejected by destination governments and need to be returned by your airline.

Portal for booking tests

Simplify the process of finding point-of-care providers and booking tests across your network. Automate the process booking of tests for dozens or hundreds of your crew at remote destinations. Let Ink take over the relationship and provide a managed service.

Generate new Ancillary revenue

Transform a tedious process for your passengers into one that creates revenue for your airline everytime your passengers book Covid-19 tests through Ink.

Ink Health

10 clear differences

The Ink Health Platform does more than Digital Health Passports (DHP). Our focus is the **collection of health information** from different sources and the interactive **vetting of that information** within an aviation process flow.

Without Ink Health, how will your airline support multiple Digital Health Passports?

We include a DHP App but you get much more...

	Ink Health		Digital Health Passports
Process multiple QR codes	Yes, by design	vs	No
Process paper certificates	Yes		No
Works before the QR Wallet is seen	Yes, suitable for crew use		No, passenger must be physically there
Reflect status in Departure Control	Yes		No
Works without Wallet App installed	Yes		No, does not work without respective app
Share result with airline (optional)	Yes, with passenger consent		No, passenger must be physically there
Book tests with managed labs	Yes		No
Vaccination-ready	Yes		No (in progress)
Create flight manifest	Yes		No
Biometrics validation in airport	Yes		No, QR code dependent

Ink Health Platform

Reactivating Travel

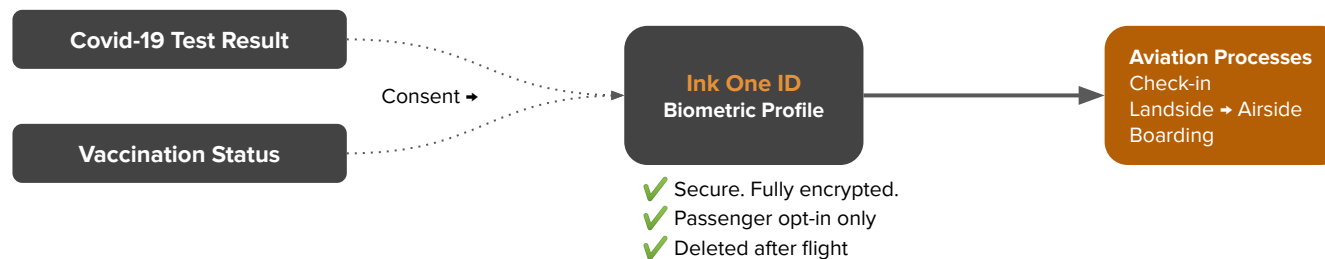

FOR AIRLINES

Ink One ID Platform

Our secure, powerful Identity Management Platform enables biometrics (optional) to simplify and speed up verification.

Roll out a touchless journey that contains Health Status alongside traditional passenger and flight info **with or without** QR codes or paper.

Ink Health Platform

Reactivating Travel

17
lab branches

Ink has been partnering with labs to carry out real Covid-19 tests.

We are adding more labs all the time as requested by our customers who are outsourcing their lab relationships to Ink.

3
airlines

Full contracts signed with some carriers; not just pilot projects.

We are prioritising our existing customers who express interest.

6
countries

We are already processing tests for customers in 6 countries, including the United States. More will be added as carrier operations ramp up.

- ✓ **Fully functional products**
- ✓ **Real system actually in use**
- ✓ **Already in iOS App Store**
- ✓ **Already in Google Play**
- ✓ **Full diagnostics platform**
- ✓ **Get up and running in days**
- ✓ **Results visible in Ink DCS**
- ✓ **Free Proof of Concept**
