TEMPTATION

The design line with the high safety standard

Public, highly frequented areas with sophisticated architecture and design, e.g. airports, public transportation stations, exhibition centres, stadiums, hospitals or shopping centres, not only demand waste- and recycling collection systems with an elegant yet subtle design. Requirements for high safety standards are also prioritized. Demands which the AUWEKO TEMPTATION series fulfils brilliantly, and not only with its patented fire safety system.

- FREE-STANDING, WALL-STANDING AND COVERED MODELS
- PATENTED AND CERTIFIED FIRE PROTECTION
- ALSO AVAILABLE AS JUMBO-VERSION WITH LARGE OPENINGS
- OPTIONAL POWDER COATED INNER LINERS FOR CORROSION PROTECTION

Other sizes as 250 x 140 mm & 320 x 140 mm are also available
and can be ordered in various combinations

TEMPTATION & SKYLINE

#FIRE-PROTECTION

The combination of unobstructed, funnel-shaped apertures with leakproof and sealed metal inner containers produces a self-extinguishing effect (patented and certified).

In addition the special interior construction minimizes the increase in temperature at, above and below the exterior housing which allows a safe removal in case of a fire inside the bin.

SKYLINE

Clear Lines with clear advantages

Smart and minimalistic: SKYLINE is the name of a high-end recycling system which we have designed in 2017. As separation of recyclable materials is becoming increasingly complex, a system with clear contours and convincing benefits meets these requirements. The SKYLINE series combines the advantages of large capacity (100 litres per compartment), large openings and certified fire protection.

- CERTIFIED FIRE PROTECTION
- LARGE CAPACITY AND LARGE OPENINGS

KENDO

The bin that knows self-defense

This new generation of litter bins offers some heavy duty advantages: their particularly robust interior and wall thickness of 2.0-3.0 mm mean that they are extremely well protected against vandalism. An innovative sealed coating on the surface which is oven-hardened at 200 degrees, makes it difficult for dirt to get a hold. Graffiti - even using permanent markers - can simply be wiped away without the need for harsh cleaning products. Unwanted stickers can be easily removed.

- EXTREMELY WELL PROTECTED AGAINST VANDALISM
- GRAFFITI CAN SIMPLY BE WIPED AWAY
- UNWANTED STICKERS CAN EASILY BE REMOVED

ORIGINAL

The Classic

You have already come across our ORIGINAL and have probably entrusted your empty snack packet to it. No wonder, because these AUWEKO litter and recycling bins have been in use by Deutsche Bahn AG, the German railway operator, for many years. In covered areas (B models), in outdoor areas (R models), as simple litter bins, as wall-mounted versions or as containers with up to 4 compartments for the perfect waste separation system.

- AVAILABLE WITH 1-4 FRACTIONS AND VARIOUS OPENINGS
- AVAILABLE WITH INTEGRATED ASHTRAY
- AVAILABLE WITH OR WITHOUT INFORMATION PANEL

SPECIAL

Recycling containers with a unique character

Even the most comprehensive product range may leave room for "special" demands. They might need to reflect the architectural features of a particular location or the character of the landscaping features. No problem for us, the high level of expertise is characterized with every special request or requirement we have fulfilled. Individual models like a tank-container for airports, a bin-garage, a recycling bin including a compartment for fire-extinguishers or transparent "Vigipirate"-bins can be found in the "special"-category.

LETTERING

For the lettering on the container body, we have chosen the high-quality, solid-colored adhesive film 800 Premium Cast from Avery, which is also used in automotive lettering, for lettering on boats, yachts, caravans, for signposts, window graphics and retail lettering.

MATERIAL

For the production of our litter and recycling bins, AUWEKO uses only high-quality materials to suit the application site and unit itself. 1.4301/1.4016 stainless steel (B.S. 304 S 15/430 S 17), galvanised or powder coated steel plate, colour coated steel plate in thicknesses from 1.25 to 6 mm. Perfect for areas in which the decisive criteria are functionality and robust construction.

CLEANING

The surfaces of our products can be treated with conventional cleaning products and disinfectants without harming the quality of the bins.
