

AEROMONITOR

UNLOCK THE POWER OF PROACTIVE AVIATION MANAGEMENT

**STREAMLINE
SAFETY**

REDUCE COSTS

**MAXIMISE
AIRPORT UPTIME**

Introducing AeroMonitor: the comprehensive SaaS solution that streamlines Airport Asset Management, providing you with intelligent insights to predict, protect, and perform efficiently. Harnessing advanced technologies, AeroMonitor minimises downtime, reduces maintenance expenses, and enhances safety protocols, keeping your airport operation ready round-the-clock.

Maintenance & Rehabilitation (M&R)

Gain greater control and insights into your airport assets. Make informed decisions based on our robust analytics platform.

Pavement Deterioration Modelling

Stay ahead of wear and tear. Our predictive models allow you to anticipate pavement deterioration and effectively plan maintenance schedules.

Extend Pavement Life

Maximize your investments by extending the lifespan of your assets. We'll help you achieve optimal maintenance timing.

Reduced Foreign Object Debris (FOD)

Increase safety and performance. We help minimize FOD risks that can lead to costly damages and disruptions.

Minimised Asset Downtime

Keep your runways and assets operational. Our streamlined process reduces downtime and keeps your operations smooth and efficient.

Contractor Management

Centralize and simplify your contractor workflows. Keep track of inspections, surveys, and work completion with ease.
