

PROTECTING WHAT MOVES THE WORLD

## TRUSTED DUAL-USE SOLUTION FOR GNSS SIGNAL MONITORING & RF INTERFERENCE DETECTION

**ECHO safeguards** GNSS-based aviation and defence operations through a mobile, scalable solution that ensures compliance with international PBN standards, **detects interference in real time** helping users take clear, **informed decisions** and builds the foundation for future location-dependent services. Users benefit of updates\*, hardware maintenance and **24/7 expert support**.

## ONE EXPERTISE. SERVING DIFERENT INDUSTRIES

*\*some features are subscription dependent

# Is your environment GNSS dependent?

## THIS IS HOW WE PROTECT IT.

### ECHO PLATFORM

A backpack sized mobile hardware & scalable software solution that:

- **Sends real-time interference alerts** and visualization tools for immediate response.
- **Creates periodical performance reports** that are clear and easy to interpret for both technical & management teams.
- **Ensures continuous GNSS monitoring & RF interference detection.**
- Offers secure, user-friendly web access from any connected device and unlimited users.
- Allows network scalability, enabling multiple stations to share and correlate data
- **Ensures compliance with international (EASA) PBN standards.**
